Online Video work during the Covid-19 Pandemic

During the pandemic, I provided many churches with video content, ranging from music to preaching (often both). I also consulted with several churches on ways to bring their worship services online.

One of the reasons I started seminary in Theology and the Arts was a calling to integrate my skills in music, therapy, sound, videography, photography, writing, preaching, and editing. The pandemic would call me to combine those skills sooner than I could have imagined. When the pandemic struck my music therapy practice and music work with seniors came to a near stop. I found myself in sudden need of work, while feeling deeply called to help churches struggling to navigate the online world. I was able to combine many of my abilities to help create sacred space and meaningful content in ways I never would have previously thought possible.

Church Guest Performances/Speaking

Performed in diverse church settings throughout Minnesota (partial list below)

With congregations and sacred spaces, I strive to create spaces of peace, as well as different ways to encounter the divine, ranging from meditative transcendent experiences to communal, upbeat experiences. For the music therapist in me facilitating interaction, as well as engaging multiple senses, is an important part of my church work.
